CUTTING GUIDE PROJECTS

Vignettes for Signs & Chip Carving

MATERIALS NEEDED:

- X-ACTO® Knives & Carving Tools
- Inkjet or Laser Printer to print templates
- Pattern Transfer Paper (carbon transfer paper)

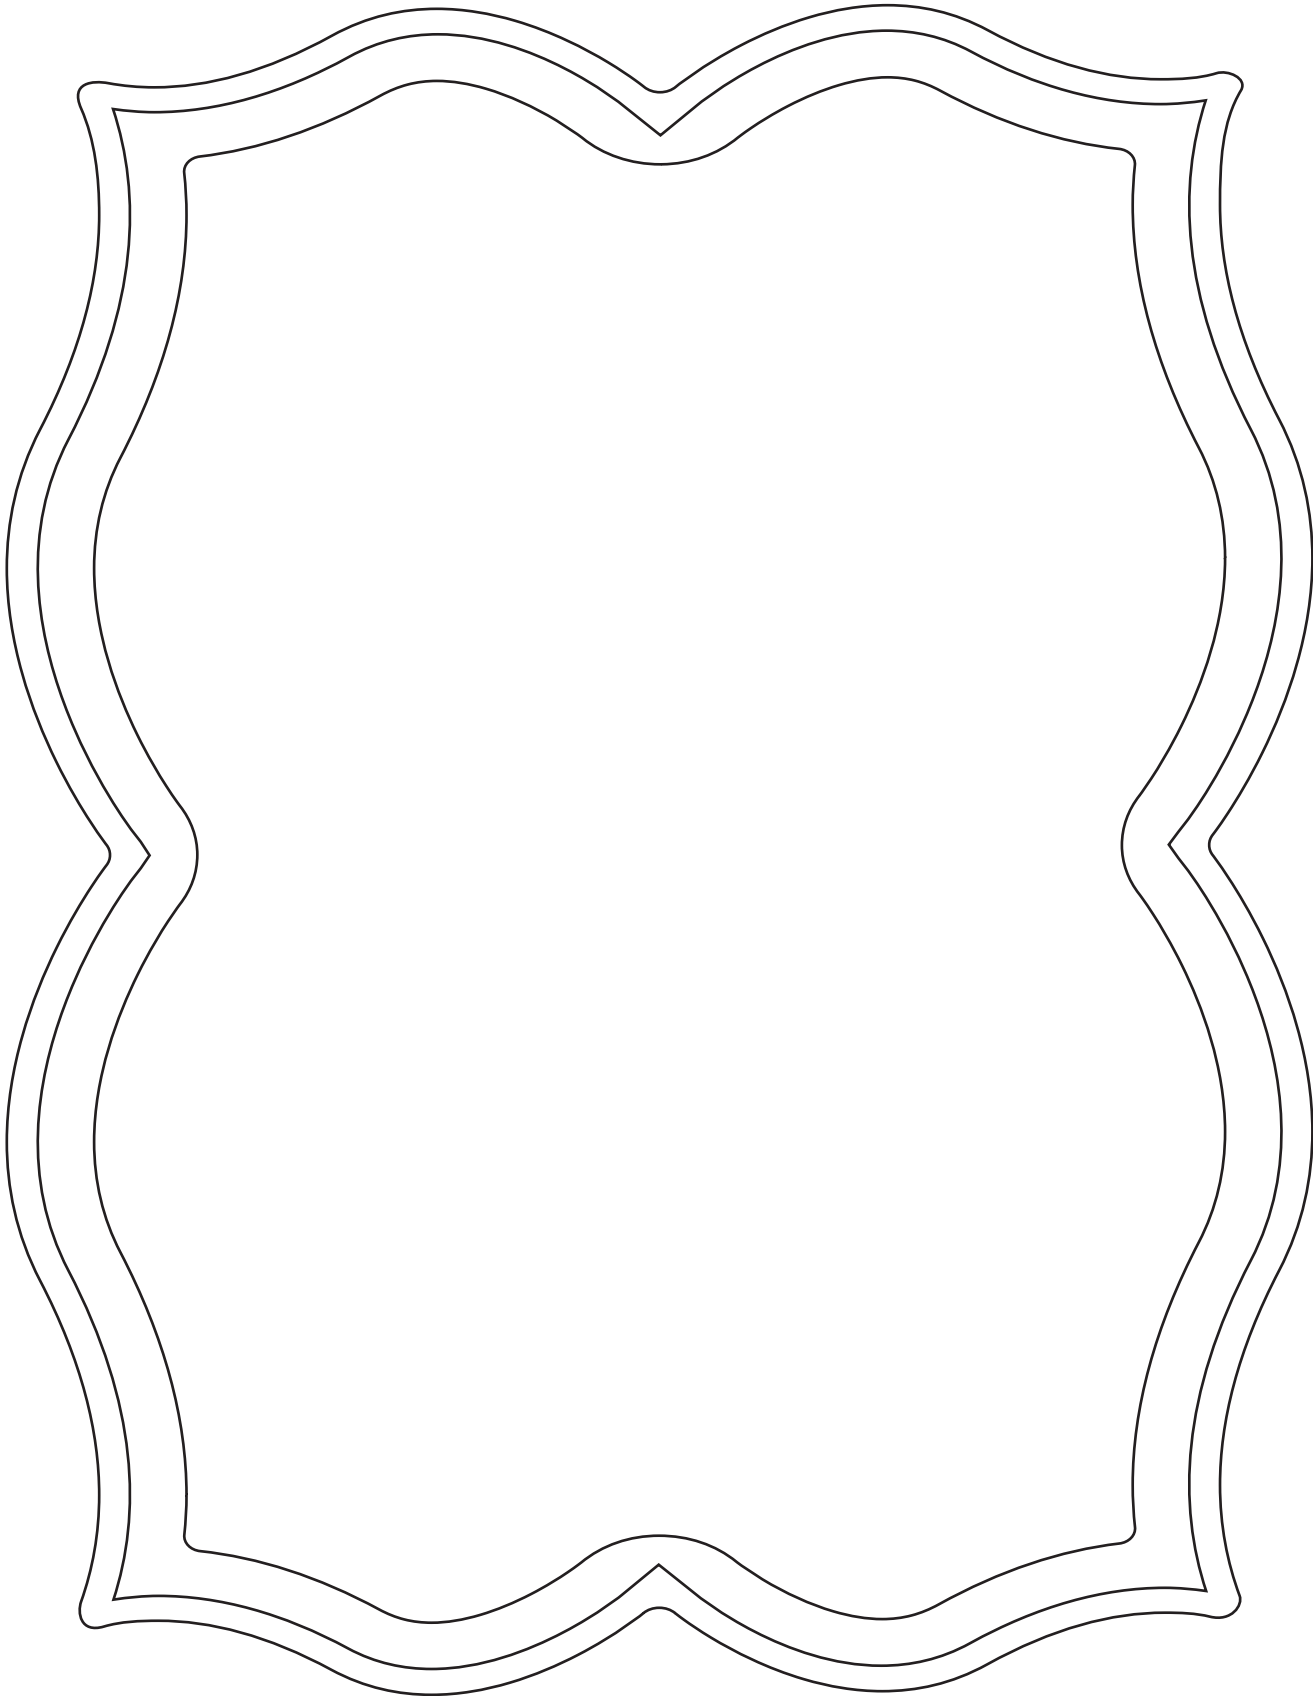

DIRECTIONS:

1. Print out the attached template that you wish to carve. You can enlarge the template to print on several pieces of paper, then tape together to have one larger template.
2. Transfer the pattern to your wood using Pattern Transfer Paper which is clean, smudge resistance, and erasable. If you don't have Pattern Transfer Paper, you can use a graphite pencil to make your own. Flip your printed template over and fill the back of it in heavily with a graphite pencil. Be sure to cover all areas behind your pattern. Secure the pattern graphite side down on the surface your are transferring the pattern to. Trace the lines on the pattern, pressing hard enough to transfer the graphite from the back of your paper.
